Dear Editor,

We submit the enclosed manuscript, "A morphological barrier: quantifying the injection realism gap for CNN strong lens finders in DESI Legacy Survey DR10," for consideration as a Paper in MNRAS.

This manuscript has not been published previously and is not under consideration by any other journal. All authors have read the final version and approved its submission.

AI tool disclosure. Per MNRAS policy, we note that AI language models (Claude, Anthropic; ChatGPT, OpenAI) were used as coding assistants during the development of analysis scripts and for manuscript copy-editing. All AI-assisted code was reviewed, tested, and verified by the authors, who are solely responsible for the scientific content of this paper.

We have no preferred or non-preferred editors or reviewers.

Yours sincerely,

Aditrivaishnavi Balaji
Parker T. Johnson
